PROJECTS

- **Blockchain-Based E-Voting System**

Designed and developed a decentralized electronic voting platform using Solidity, Hardhat, and Next.js to ensure secure, transparent student union elections. Integrated MetaMask for voter authentication and implemented vote counting on the Ethereum blockchain to prevent tampering and double voting.

- **Student Result Management System**

Built a web-based application for managing and generating academic results using PHP, MySQL, and Bootstrap. Enabled student registration, result input by staff, GPA calculation, and printable transcripts. Improved record-keeping accuracy and reduced manual errors.

- **Weather Forecast Chatbot for Students**

Created an intelligent chatbot using Python, Dialogflow, and OpenWeatherMap API to provide real-time weather updates and campus-related advice to students. Deployed it on Telegram, allowing students to check forecasts and receive weather safety tips through natural language interaction.

- **Inventory and Warehouse Management System**

Developed a desktop-based inventory system for a local distribution company using Java and SQLite. The system featured product tracking, stock level alerts, and daily transaction logs. Helped reduce overstocking and understocking by 35%.

- **Online IT Support Ticketing System**

Implemented a ticket-based support platform using Flask, Firebase, and JavaScript for handling students' ICT complaints at the university. The system included automatic issue categorization, chatbot suggestions, and ticket status tracking. Reduced support response time by over 50%.

ACHIEVEMENTS & AWARDS

- Certified Huawei Datacom Engineer Obtained professional certification in Huawei Datacom technologies, with demonstrated expertise in routing, switching, and enterprise network configuration.
- Software Developer Graduate – B.Sc. Information Technology Graduated with a strong academic foundation in software engineering, system design, and emerging technologies.
- Google Developer Student Clubs (GDSC) Ambassador – University of Ilorin Served as the official GDSC campus ambassador; organized workshops and tech events to promote peer learning and Google technologies among students.
- Hackathon Finalist – Developers Tech Hunt (IoT Power Control System) Secured a finalist position in a competitive hackathon by developing an IoT-based power supply control system. The solution enabled real-time monitoring and remote power management for smart buildings.
- Project Lead – Blockchain-Based E-Voting System Led the development of a decentralized voting platform using Solidity and Next.js, enhancing transparency and trust in student elections through blockchain technology.
